Double stage low-medium Pressure self-driven regulators

Beomators	•EX	
Regulators F		
using Natural Gas, LPG and other non cor	ring loaded regulators are widely used in both civil and industrial installations	
	a gas meter and for use in general pipeline work. They can be mounted in	
	rom weather. Where the installation is in an enclosed area, the internal relief	
vent can be piped to outside.	accurate regulation and high operational reliability.	• •
Simple installation procedure.		
The regulators are manufactured according	g to UNI 8827.
